

# SPEED BUMPS ON ASTOR ST.

By: Edwin Torres  
Manuel Vidrizca  
Period 3

# Proposal

- Our goal is to get speed bumps put on Astor st.
- We have heard people complaining that there should be speed bumps
- Too many cars racing at night

# Why this project?

- ① We choose this project because of the neighborhood complaints in city hall
- ① Also to keep the neighborhood safe and to have neighborhood cars slow down
- ① I also happen to hear the cars at night

# Thinking it through

- We have heard from neighbors that cars race on this street at night and don't let people sleep
- Neighbors don't want their cars or property to be destroyed
- They also don't want someone to get hurt

# Civic action #1

- Went around neighborhood asking people to sign the petition about putting speed bumps on the street
- Collected 70 signatures

# Civic action #2

- Sent an email to city councils of city hall to make appointment and explain what can be made and changed
- Going to talk to Ivan Altamirano, a city council member

# Civic action #3

- Made a phone call with a council member to schedule an appointment to converse about our senior project and how we can make a difference in our problem

# Civic action #4

- ④ We went to the meeting and talked about our problem
- ④ They (council members/ associates) told us that we have to go to traffic commission meetings and explain our problem to them with evidence of other people also wanting speed bumps and support from those people

# Report

- We did not succeed with our project but what we got done was more Public Safety and police on the street to be checking on cars and making sure no one passes the speed limit or causes accidents

# Reflection/ Advise

- Overall we learned more history about our neighborhood and at least got something on the street that's better than nothing
- We advise you to watch out for speeding cars and to call the police if you see cars racing on your street
