

Civic Action Project CAP Planner #WhatItTakes

CIVIC ACTION #_____

As people work to address problems, they usually have to take a series of civic actions to be effective. Demonstrate your critical thinking skills by analyzing your last civic action and planning your next. You'll use this form more than once.

Step 1: What is the problem, issue, or policy you are working on?

Step 2: What was your last civic action and how did it move you closer to your goal?

Tip: It's ok if your civic action didn't quite get the job done. Just explain why you did it and what you hoped for. WHST.11-12.1

Step 3: What is your next civic action? Be specific. Click here to get ideas or post on the CAP Discussion Board to get advice.

Step 4: What is your intended outcome? Why do you think this is a good next step?

When do you expect to complete this proposed action?
