

Civic Action Project #WhatItTakes

CAP ASSIGNMENT

At this moment in time, all of us are having to keep up with policies related to the COVID-19 pandemic. Our system of government provides for power to be divided between the national (federal) government and the states. Within states, there is further division of power between the state and local governments (county, city, parish, townships, etc.) This system of government is called "federalism."

Assignment: Find at least three COVID-related policies from the federal, your state, and your local government that apply to you and/or your family. (You can also include policies that did apply, but have now been lifted.)

Federal Policies

State Policies

Local Policies
